

Online Group Protection – Master CL@SS

Canada Life is delighted to announce further enhancements to **CLASS**. These changes will provide you with a more comprehensive scheme management experience and are supported by improvements to all our **CLASS** related literature.

Since its launch in 2005, **CLASS** has developed in line with the growth and demands of our eCommunity. While some of these enhancements have always been planned to fit with our original vision for **CLASS**, others have been brought about by the feedback and support of the IFA market.

From this feedback we are delighted to offer you a **CLASS** system that now:

- Allows 'Pension Scheme eligibility',
- Enables you to build in pension scheme contributions and employer's National Insurance contributions (for Group Income Protection) to your quotes,
- Offers up to eight categories of membership across all three products, and;
- Allows five salary definitions for each of the three products.

All of these enhancements will contribute to providing a more flexible and in depth end-to-end quote management experience giving you more options and control than ever before.

Added to the unbeatable turnaround times **CLASS** ensures and rates that average out 15% cheaper than standard office quotes; its clear that switching on to **CLASS** is a great step towards improving your operational efficiency.

At Canada Life we are committed to providing effective support that's easy to engage with. While delivering these latest changes we have reviewed our literature to help bring added clarity to the process of eProduct scheme management.

We continue to invest in **CLASS** to make sure that your online experience is everything you need it to be. With more users than ever before taking advantage of the range of benefits and options the system can offer, now has never been a better time to start using **CLASS**.
